LEARNING FOR THE WAY YOU LIVE

Suggested Course of Study for Elementary and Middle School Students

It is common for students to work at more than one level, such as second grade reading and third grade math. These are suggestions to help you select the appropriate courses for your child, but you are free to "mix and match" levels to best meet the needs of your child.

Kindergarten:

Language Arts K

*Math U See is a skill based series and is not divided by grade level. You or your child's Education Consultant can give your child a short pre-test to determine the right level before you purchase materials. The test is available for download at http://www.mathusee.com/about-us/assessment/. Student kits and manipulatives are available for purchase at http://store.mathusee.com/.

Available for Any Grade:

Reading Horizons provides phonics instruction for students who are behind level in reading. $30 per month
